Components\Button\Button.jsx

```jsx
 1  import React from "react";
 2  import { TouchableOpacity, Text } from "react-native";
 3  import { s } from "./Button.style";
 4
 5  export function Button({ type, title, onPress, style}) {
 6      const buttonstyle = type === 'inscription' ? style = s.btnWhite : s.btnPurple;
 7      const textstyle = type === 'inscription' ? s.txtPurple : s.txtWhite;
 8    return (
 9      <TouchableOpacity onPress={onPress} style={buttonstyle}>
10        <Text style= {textstyle}>{title}</Text>
11      </TouchableOpacity>
12    );
13  }
14
```
